

MACHINING

MILLING

MACHINING/MILLING

We do custom machining of both piece parts and large weldments. Our Machining Centers are frequently combined together with our portable brake presses and welding equipment to form flexible manufacturing cells.

We machine all our own weld fixtures in house to guarantee quality and adherence to tolerances.

Our Machining Department works in concert with all our manufacturing capabilities allowing us to be your full service fabricator of choice.

Machining Centers

HAAS VF-6

- NC - 64 x 32 x 30 - 3 axis - 20 pocket tool changer
