

# PRESSES

## BRAKE

## BRAKE PRESSES

At Steel Craft Corp. FLEXIBILITY is the key to plate and sheet forming. All twelve (12) of our Brake Presses have NC programmable gauging systems allowing us to perform multiple bends in a single setup.

Our five (5) portable Premier presses can easily be moved and combined with other fabrication operations to set up flexible manufacturing cells.

## Result

- Reduced setup times save you money
- Lean Manufacturing. When combined into cells, forming operations are performed during the cycle time of related operations, reducing overall labor time, increasing efficiency and reducing costs.

## Brake Presses

### CINCINNATI CB350

- Tonnage = 350 bed size = 14' w/Hurco back gauge

### CINCINNATI CB230

- Tonnage = 230 Bed size = 14' w/Hurco back gauge

### NIAGARA HYDRAULIC

- Tonnage = 175 Bed Size = 12' w/Autogauge

### NIAGARA HYDRAULIC

- Tonnage = 135 Bed Size = 12' w/Zekron back gauge

### CINCINNATI FM2

- Tonnage = 135 Bed Size = 10' w/Formmaster II

### CINCINNATI

- Tonnage = 135 Bed Size = 8'

### CINCINNATI FM2-90

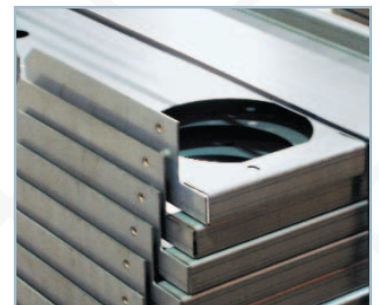

- Tonnage = 90 Bed Size = 10' w/Formmaster II

### PREMIER (4)

- Tonnage = 40-60 Bed Size = 4 1/2' Autobend

### PREMIER

- Tonnage = 70 Bed Size = 8' bed cybelic
